MyBRD Net

Practical Guide for using the Token Device
What is the Token Device?

It is a device which calculates a unique code, with which you, as a client of the MyBRD Net application, can use for accessing the service and for signing transactions if you have chosen this method for authentication and transactions signing. This code is valid for a limited period of time.

How to initiate the Token on its first use

The device is protected by a PIN number (an identification number consisting of 4 digits, which is confidential). Only by knowing this access code you can generate unique codes. Thus:

1. Turn on the device by pressing the button marked with an arrow (bottom right-hand corner).
2. Set your PIN number.

The PIN shall be set on the first use of the token when the device asks you to enter and confirm this code using the <NEW PIN> and <PIN CONF> screens. From this time on, the PIN number you have set will protect the Token device.
How to use the device

In order to obtain the unique code required for signing into the MyBRD Net application (by accessing www.mybrdnet.ro), turn on the device by pressing the button marked with an arrow. Once it is on, you must enter the PIN number you have previously set.

What you also need to know: The unique codes are generated by the token device using keys 1, 2 and 3:

Key 1
The token generates a unique code to be introduced in the Internet banking screen in the signing section.

Key 2
Enter the code displayed in the Internet banking screen in the signing section, and the Token will generate a unique code for that transaction.

Key 3
Enter the two codes displayed in the Internet banking screen in the signing section, and the Token will generate a unique code for that transaction.

This means that, according to the complexity of each transaction, a different transaction signing method is used. No need to worry, you will know what option to use if you follow the instructions available in MyBRD Net in the transaction signing section.
Key 1:

**STEP 1**
Enter the PIN number, whereupon &lt;APPLI-&gt; will be displayed on the screen;

**STEP 2**
Press key 1, whereupon the device will generate the 6-digit code;

**STEP 3**
The displayed code will be used to sign the transaction initiated via MyBRD Net.
Key 2:

**STEP 1**

Enter the PIN number, whereupon `<APPLI->` will be displayed on the screen;

**STEP 2**

Press key 2, whereupon the screen will appear where you must enter the 6-digit code generated on the website, in the MyBRD Net application on reaching the transaction signing section;

**STEP 3**

Enter the code from the website in the token and it will generate a new 6-digit code which you will enter in the appropriate field of MyBRD Net in order to sign the transaction in question.
**Key 3:**

**STEP 1**
Enter the PIN number, whereupon `<APPLI->` will be displayed on the screen;

**STEP 2**
Press key 3, whereupon the two screens will appear in turn where the codes generated in MyBRD Net are to be entered. Code 1 shall be entered in the token when the message `<1 ------ >` is displayed and code 2 shall be entered in the token when the message `<2 ------ >` is displayed;

**STEP 3**
The code generated by the token will be the one you use to sign the transaction.

If you press the wrong key, you can return to the `<APPLI->` menu by pressing the button marked with an arrow.
How to change the PIN number

You may change the PIN number set on initialising the token device at any time. In order to do this, turn on the device and keep pressing the button marked with an arrow for several seconds. The screen will feature the message “New PIN” where you must enter the new PIN number (4 digits) and confirm it by re-entering it when the message “Conf PIN” appears.

How to unblock the Token

If you have entered the wrong PIN number 5 times in a row, the device will be blocked. However, you can unblock it at any time if you get in touch with the nearest BRD agency.
The **team at BRD Groupe Société Générale** is at your disposal:

- Your consultant in the agency (check the list of agencies on www.brd.ro/agencies&atms)
- MyBRD Contact **0800.803.803**, a TelVerde number that is free in the Romtelecom network; **021.302.61.61**, a number which may be called from any telephone network; **^BANCA (*22622)**, a number with normal rates which may be called from the Orange or Vodafone networks
- Internet **www.brd.ro**
