MyBRD Net

Practical Guide for using the
Token Device

◀ ▶ 🔒 BRD - Groupe Société Générale SA | www.mybrdnet.ro 🔍

1 What is the Token Device?

It is a device which calculates a **unique code**, with which you, as a client of the **MyBRD Net** application, can use for accessing the service and for signing transactions if you have chosen this method for authentication and transactions signing. This code is valid for a limited period of time.

2 How to initiate the Token on its first use

The device is protected by a **PIN number** (an identification number consisting of 4 digits, which is confidential).

Only by knowing this access code you can generate unique codes. Thus:

Turn on the device

by pressing the button marked with an arrow (bottom right-hand corner) ◀ .

Set your PIN number.

The PIN shall be set on the first use of the token when the device asks you to enter and confirm this code using the **<NEW PIN>** and **<PIN CONF>** screens. From this time on, the PIN number you have set will protect the Token device.

3 How to use the device

In order to obtain the unique code required for signing into the **MyBRD Net** application (by accessing **www.mybrdnet.ro**), turn on the device by pressing the button marked with an arrow. Once it is on, you must enter the **PIN number** you have previously set.

What you also need to know: The unique codes are generated by the token device using keys **1, 2** and **3:**

▶ **Key 1**

The token generates a **unique code** to be introduced in the Internet banking screen in the **signing section**.

▶ **Key 2**

Enter the code displayed in the Internet banking screen in the signing section, and the Token **will generate a unique code for that transaction**.

▶ **Key 3**

Enter the two codes displayed in the Internet banking screen in the **signing section**, and the Token **will generate a unique code for that transaction**.

This means that, according to the complexity of each transaction, a different transaction signing method is used. No need to worry, you will know what option to use if you follow the instructions available in **MyBRD Net** in the **transaction signing** section.

BRD - Groupe Société Générale SA | www.mybrdnet.ro

Key 1:

STEP 1 — Enter the PIN number, whereupon <APPLI-> will be displayed on the screen;
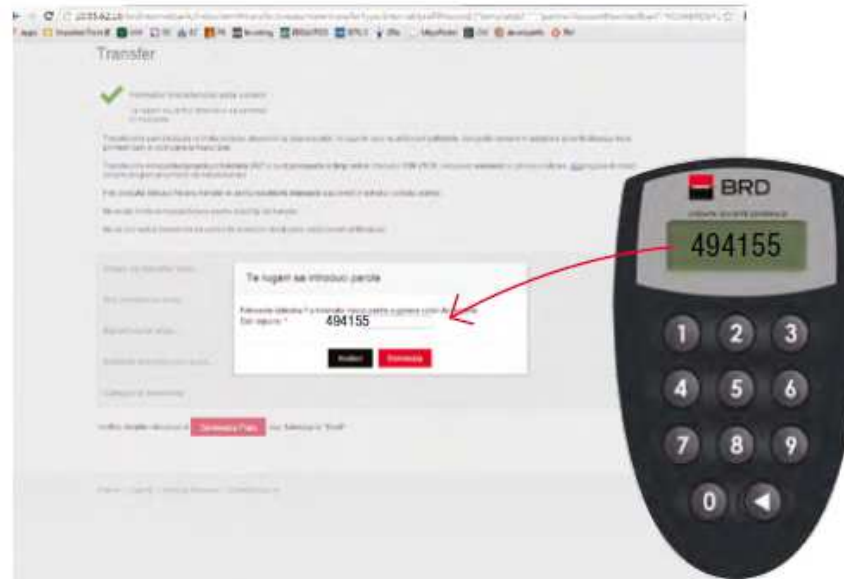

STEP 2 — Press key 1, whereupon the device will generate the 6-digit code;

STEP 3 — The displayed code will be used to sign the transaction initiated via MyBRD Net.

BRD - Groupe Société Générale SA   www.mybrdnet.ro

Key 2:

APPLI

**STEP 1**   Enter the PIN number, whereupon <APPLI-> will be displayed on the screen;

STEP 2   Press key 2, whereupon the screen will appear where you must enter the 6-digit code generated on the website, in the MyBRD Net application on reaching the transaction signing section;

494155

STEP 3   Enter the code from the website in the token and it will generate a new 6-digit code which you will enter in the appropriate field of MyBRD Net in order to sign the transaction in question.

Key 3:

STEP 1 **Enter the PIN number, whereupon <APPLI-> will be displayed on the screen;**
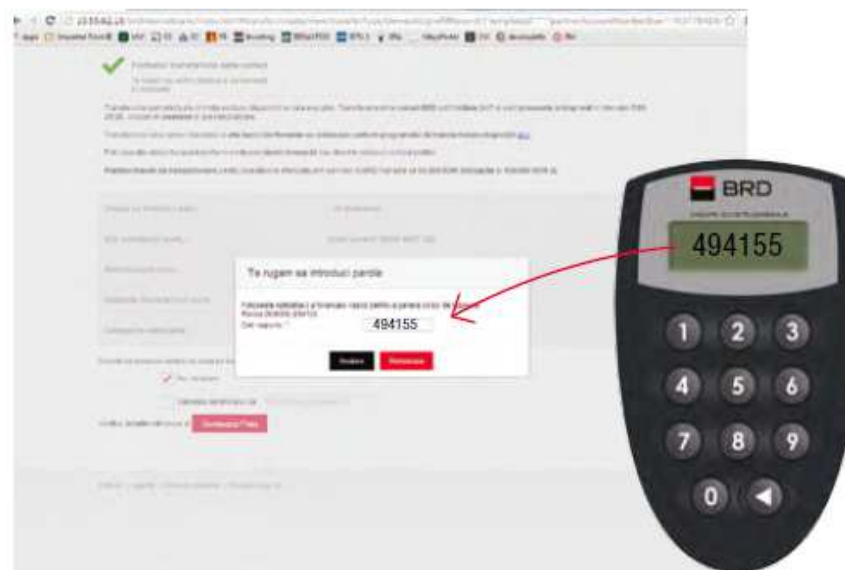

APPLI

STEP 2 **Press key 3, whereupon the two screens will appear in turn where the codes generated in MyBRD Net are to be entered. Code 1 shall be entered in the token when the message <1 ------ > is displayed and code 2 shall be entered in the token when the message <2 ------ > is displayed;**

1- 000099   2- 864100

STEP 3

The code generated by the token will be the one you use to sign the transaction.

If you press the wrong key, you can return to the <APPLI-> menu by pressing the button marked with an arrow.

4 How to change the PIN number

You may change the **PIN number** set on initialising the token device at any time. In order to do this, **turn on the device** and **keep pressing the button marked with an arrow for several seconds.** The screen will feature the message **"New PIN"** where you must **enter the new PIN number (4 digits)** and **confirm it by re-entering it** when the message **"Conf PIN"** appears.

5 How to unblock the Token

If you have entered the wrong PIN number 5 times in a row, the device will be blocked. However, you can unblock it at any time if you get in touch with the nearest **BRD agency**.
