Introduction

THE SCOPE OF THE REPORT

BRD's Report on Transparency and Disclosure Requirements is prepared according to Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012, the Guidelines on disclosure requirements in Part Eight of Regulation (EU) No 575/2013 (EBA/GL/2016/11), the Guidelines on disclosure of non-performing and forborne exposures (EBA/GL/2018/10) and the Guidelines on reporting and disclosure of exposures subject to measures applied in response to the COVID-19 crisis (EBA/GL/2020/07).

BRD applies article 13 (1) of Regulation (EU) No 575/2013, according to which significant subsidiaries of EU parent institutions and those subsidiaries which are of material significance for their local market shall disclose the information specified in articles 437 (own funds), 438 (capital requirements), 440 (capital buffers), 442 (credit risk adjustments), 450 (remuneration policy), 451 (leverage) and 453 (credit risk mitigation techniques) on an individual or sub-consolidated basis. Additionally, as per the Guidelines on disclosure requirements in Part Eight of Regulation (EU) No 575/2013, BRD also discloses information according to article 435 point 2 (governance arrangements) and article 443 (unencumbered assets).

CONSOLIDATION PERIMETER

As BRD is parent credit institution in Romania and, at the same time, subsidiary of Société Générale, the prudential consolidation perimeter is applied for the purpose of this report.

For the scope of prudential consolidation, the BRD Group includes the following entities:

- BRD - Groupe Société Générale SA;
- BRD Sogelease IFN SA;
- BRD Finance IFN SA.

All amounts in this report are in RON thousand at December 31, 2020, unless otherwise stated**.**

LOCATION OF PILLAR 3 DISCLOSURES

This report complements and/or details information provided in BRD's Annual Board of Directors Report for the year 2020 and the Consolidated and Separate Financial Statements as at December 31, 2020. The documents are available electronically at https://www.brd.ro/en/about-brd/investors-and-shareholders/financial-information/financial-results.

The disclosure index below provides information on where information required in Part Eight of Regulation (EU) No 575/2013 can be found.

Table 1: Disclosure index

CRR article number	CRR article description	Reference to the chapter in the present document	Reference to external documents
435 (2)	Governance arrangements	Chapter 1: Governance arrangements ✓ the number of directorships held by members of the management body; ✓ the recruitment policy for the selection of members of the management body and their actual knowledge, skills and expertise; ✓ the policy on diversity with regard to selection of members of the management body, its objectives and any relevant targets set out in that policy, and the extent to which these objectives and targets have been achieved; ✓ whether or not the institution has set up a separate risk committee and the number of times the risk committee has met; ✓ the description of the information flow on risk to the management body. 1 Governance arrangements

BRD-Groupe Société Générale adopted a unitary management system that is fully consistent with the principles of good corporate governance, transparency of relevant corporate information, protection of shareholders and of other categories of concerned persons (stakeholders), as well as of an efficient operation on the banking market.

The internal governance of BRD-Groupe Société Générale S.A. is aligned with that of the parent company, Société Générale. BRD has adopted, and applies, on a voluntary basis, the provisions of Corporate Governance Code of the Bucharest Stock Exchange (BSE) and reports annually the compliance with its provisions.

The structure, the size and the skills of the management body (in its supervisory function - Board of Directors and the senior management - Management Committee) are well suited for the dimension and the complexity of the Bank's activity.

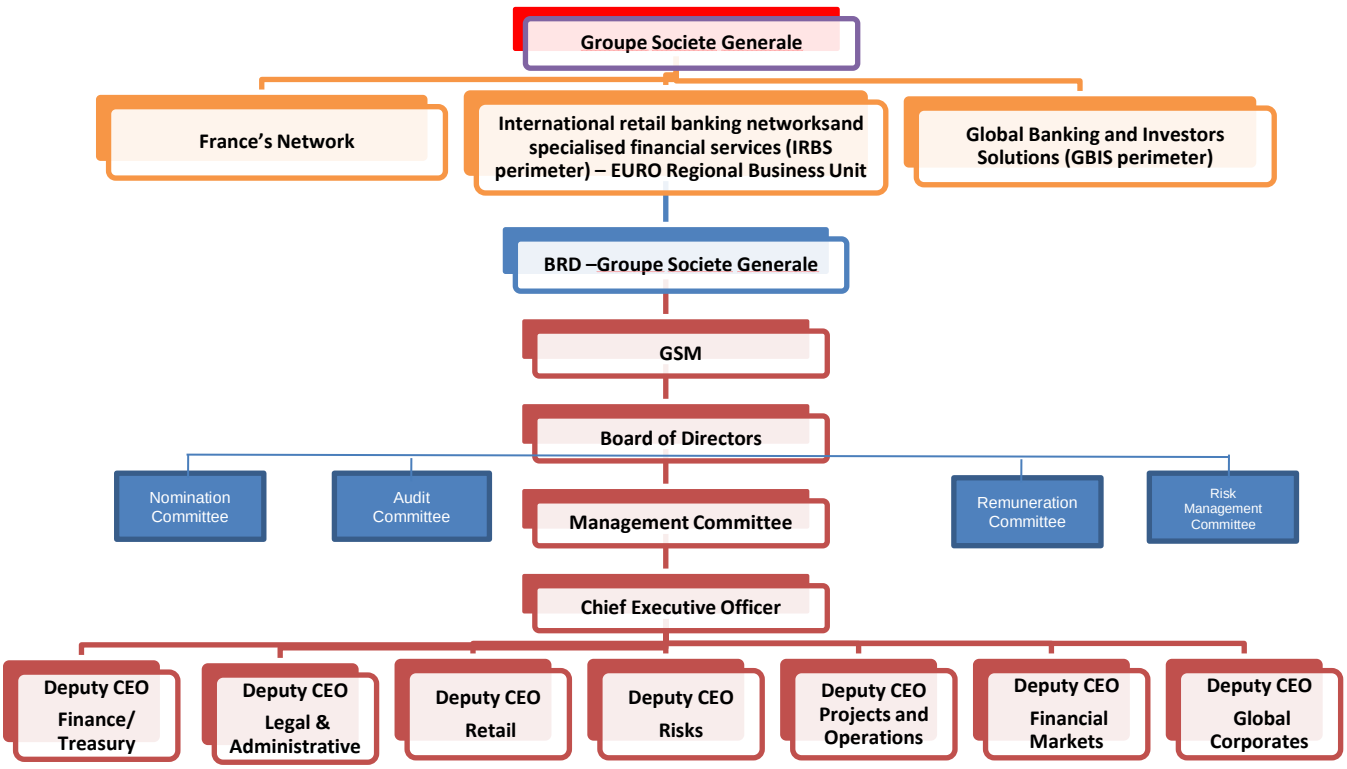
The members of the management body commit sufficient time to their responsibilities as stipulated by the law and the statutory bodies.

The members of the management body have the necessary expertise to carry out their responsibilities and take decisions independently.

The management body promotes both high ethical and professional standards, as well as a strong culture of internal control.

An overview of the organizational chart of the Bank is presented in the chart below.

Table 2: BRD-Groupe Societe Generale Organizational Chart



The structure and organization of the management body are presented in Chapter 2 - Corporate governance of BRD's Annual Board of Directors' Report and also in BRD's Corporate Governance Code in Chapter 2 "Corporate governance structures" and in BRD's Articles of Incorporation, documents, available to the interested parties on the institutional site in the section: Investors and shareholders.

At the same time, information on the professional experience of members of the Bank's management body can be found on the institutional site at: https://www.brd.ro/en/about-brd/about-us/about-brd/management.

All members of the management body comply with the legal provisions on the cumulative mandate established by the applicable law in force. Information on the number of directorships held by each member of the management body are presented in BRD's Annual Board of Directors' Report 2020 (Chapter 2 - Corporate Governance) and can be consulted on the institutional site at: https://www.brd.ro/_files/pdf/BoR_Report_2020_ENG.pdf.

BRD's Annual Board of Directors Report 2020 (Chapter 2 - Corporate Governance) contains information on the main changes in the management body on 2020 and the year of expiry of the current mandates of BRD's members of Board of Directors.

In order to support the Board of Directors and the Management Committee activity, several committees are set up and operate within the Bank.

The mission, the structure, the rules regarding the organization and functioning of the committees supporting the Board of Directors and the Management Committee are presented in BRD's Corporate Governance Code, Chapter 2 "Corporate governance structures" and also in BRD's Annual Board of Directors' Report, Chapter 2 - Corporate Governance, available on the institutional site at: Investors and shareholders.

THE ATTENDANCE OF THE MEMBERS OF THE MANAGEMENT BODY TO THE MEETINGS IN 2020

BRD's Annual Board of Directors' Report 2020, Chapter 2 - Corporate Governance, that can be consulted on the institutional site athttps://www.brd.ro/_files/pdf/BoR_Report_2020_ENG.pdf, contains details regarding the meetings, their frequency and the subjects discussed.

As at December 31, 2020, the members of the Board of Directors had a 99% attendance rate to the Board meetings, while members of the Management Committee had a 93.42% attendance rate.

THE RECRUITMENT POLICY FOR THE SELECTION OF MEMBERS OF THE MANAGEMENT BODY

The Bank has a policy setting out the criteria, processes and measures applied by the Bank for the selection, assessment of adequacy (monitoring) and succession planning of members of the Board of Directors and the Management Committee. The responsibility for the process of selection, monitoring and planning of the succession of the members of the management body rests to the Nomination Committee. The Nomination Committee actively contributes to those processes.

The criteria for nominating candidates are at least the following:

- to have a good reputation;
- to have the professional experience adequate to the nature, extent and complexity of the banking business and of the entrusted responsibilities;
- to ensure collective competence of the management body by the co-optation of the new member, as well as the balance of knowledge, skills, diversity and experience of the Management Body for an efficient and performant management of the Bank's activity;
- to ensure diversity within the Management Body in terms of skills and competences, to ensure that the Management Body's decision-making process is not dominated by any person or small group of persons in a way that is detrimental to the Bank's interests, the diversity in terms of age, experience, etc .;
- to ensure a sufficient number of independent directors at the level of the Board of Directors and of the Committees set up to support of the activity of the Board of Directors;
- to achieve the gender target.

The main objective of the selection process is to ensure suitable candidates for the vacant positions in the Management Body or to ensure the succession of the existing members.

The selection of the candidates excludes any discrimination on gender, age, ethnicity or any other kind of discrimination, stipulated by the law.

Criteria such as reputation, theoretical and practical professional experience in specific areas of BRD–Groupe Société Générale's activities, as well as diversity of the management body, ensure a suitable structure of the management body.

The selection of independent directors is subject to compliance with the criteria stipulated by the Companies' Law no. 31/1990, NBR Regulation no. 5/2013 on prudential requirements for credit institutions, EBA Guidelines on the assessment of the suitability of members of the management body and key function holders and by the Bucharest Stock Exchange Code of Corporate Governance.

The exercise of the responsibilities by members of the Management Body is subject to obtaining NBR approval.

THE DIVERSITY POLICY

According to the Nomination Committee Report on assessing that the adequacy of the management body and its members, size, structure and balance of knowledge, skills and experience are adequate to the responsibilities of the management body:

- the number of directors (9) and executive officers (8) is appropriate to the size, complexity and nature of the Bank's activity;
- the structure of the Board of Directors ensures a proper balance between executive and non-executive members (8 non-executive members and 1 executive member);
- the Board of Directors has 3 independent directors;
- the structure of the management body ensures age, gender and geographical diversity;
- the professional experience of the members of the management body in areas such as: financial-banking, capital markets, risk, audit / control, retail, their access to international information and, also, the academic experience of some members, offers professional diversity

THE INFORMATION FLOW ON RISK TO THE MANAGEMENT BODY

The information flow on risk to the management body is detailed in ''BRD's Annual Board of Directors' Report 2020'' in Chapter 6 - Risk management, subchapter Risk management governance, document that can be consulted on the institutional site at:
https://www.brd.ro/_files/pdf/BoR_Report_2020_ENG.pdf.

2 Own funds

CONSOLIDATION PERIMETER

The basis for calculation of own funds is the consolidated prudential perimeter.

BRD Group consolidation perimeter for prudential purposes is defined in accordance with Regulation (EU) No 575/2013 (CRR), Part One, Title II, Chapter 2, Section 3.

The consolidated entities for prudential scope are identified based on the criteria as per Articles 4 (1) (3), (16) to (27), 18 and 19 of CRR. According to Article 4 of CRR, entities consolidated in the prudential reporting must have one of the following types of activity: credit institution, investment firm, ancillary services undertaking and/or other financial institution. In contrast, in accordance with IFRS financial statements, all entities controlled directly or indirectly (including non-financial entities, insurance companies, etc.) are fully consolidated.

Additional exclusion of subsidiaries from prudential consolidation perimeter is based on criteria from Article 19 of CRR.

Based on the above, the prudential consolidation perimeter of BRD Group includes the parent company BRD - Groupe Société Générale S.A and two of its subsidiaries:

- BRD Sogelease IFN S.A.
- BRD Finance IFN S.A.

Table 3: EU LI3 – Outline of the differences in the scopes of consolidation (entity by entity)

Name of the entity	Method of accounting consolidation	Method of regulatory consolidation		Description of the entity
		Full consolidation	Recognised under the equity method	
BRD Sogelease IFN SA	Full consolidation	X		Financial lease company
BRD Finance IFN SA	Full consolidation	X		Financial institution
BRD Asset Management SAI SA	Full consolidation		X	Fund administration company

OWN FUNDS

BRD Group regulatory own funds as at December 31, 2020 amounted to RON 9,056 million (including the 2020 net result, net of dividends approved by the GSM on 22nd of April 2021) compared to RON 7,559 million as at December 31, 2019 (own funds at December 31, 2019 include the full net year result, according to the decision of the General Meeting of Shareholders which approved the allocation of the full year 2019 net profit to retained earnings) and consist of common equity capital (CET1).

The basis for calculating own funds is the prudential consolidation perimeter as presented above. The reconciliation of consolidated balance sheet according to IFRS financial statements and the balance sheet prepared for prudential consolidation purposes is presented in Table 4. The structure of own funds is presented in Table 5.

Common Equity Capital (CET1) includes:

- Eligible Capital includes the nominal share capital and the hyperinflation adjustment of share capital accounted until December 31, 2003. As at December 31, 2020, the share capital amounted to RON 696.9 million, unchanged versus previous periods. The hyperinflation adjustment amounted to RON 1,819 million.
- Eligible Reserves include:
    - Retained earnings, which represent the undistributed profits of previous periods and retained earnings arising from IFRS implementation adjustments.

- Other reserves: legal reserves, reserves for general banking risks or other reserves established by the law and defined pension plan reserve.

- Other comprehensive income (OCI) includes unrealized gains and losses from changes in the fair value of debt instruments at fair value through other comprehensive income and from re-measurement of defined benefit liability arising from the post-employment benefit plan.

Regulatory deductions from CET 1 applicable as at both for December 31, 2020 and December 31, 2019 essentially involved the following elements:

- Starting 31 December 2020, intangible assets that are not prudently valuated as per Regulation 876/2019 are deducted 100% from CET 1 (as compared to previous periods when intangible assets accounting value was fully deducted from CET 1). Under this current approach, the positive difference between the prudential and the accounting amortisation becomes fully deducted from the CET 1 capital, while the residual portion of the carrying value of the software prudently valuated is risk weighted at 100%. Goodwill is fully deducted from CET 1 capital – see reference 1&2 in table 4.

- Contingent or any foreseeable tax charges related to CET 1 reserves taxable upon utilization to cover losses or risks.

BRD Group accounting minority interest is not eligible as CET 1 capital as at 31 December 2020 – see reference 5 in table 4

As at December 31, 2020 and December 31, 2019 the Bank had no Additional Tier 1 or Tier 2 capital instruments issued and outstanding.

Further details on own funds are presented in Table 5 - Regulatory own funds and solvency ratios.

A description of the main features of regulatory capital instruments is provided in Table 6 - Own funds disclosure template.

28	**Total regulatory adjustments to Common equity Tier 1 (CET1)**	**-615,067**	
29	**Common Equity Tier 1 (CET1) capital**	**9,056,309**	

30	Capital instruments and the related share premium accounts	-	51, 52
31	of which: classified as equity under applicable accounting standards	-	
32	of which: classified as liabilities under applicable accounting standards	-	
33	Amount of qualifying items referred to in Article 484 (4) and the related share premium accounts subject to phase out from AT1	-	486 (3)
	Public sector capital injections grandfathered until 1 January 2018	-	483 (3)
34	Qualifying Tier 1 capital included in consolidated AT1 capital (including minority interests not included in row 5) issued by subsidiaries and held by third parties	-	85, 86, 480
35	of which: instruments issued by subsidiaries subject to phase out	-	486 (3)
36	**Additional Tier 1 (AT1) capital before regulatory adjustments**		
	Addltlonal Tier 1 (AT1) capltal: regulatory adjustments		
37	Direct and indirect holdings by an institution of own AT1 Instruments (negative amount)	-	52 (1) (b), 56 (a), 57, 475 (2)
38	Holdings of the AT1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)	-	56 (b), 58, 475 (3)
39	Direct and indirect holdings of the AT1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above the 10% threshold and net of eligible short posi-lions) (negative amount)	-	56 (c), 59, 60, 79, 475 (4)
40	Direct and indirect holdings by the institution of the AT1 instruments of financial sector entities where the insti-tution has a significant investment in those entities (amount above the 10% threshold net of eligible short positions) (negative amount)	-	56 (d), 59, 79, 475 (4)
41	Regulatory adjustments applied to additional tier 1 in respect of amounts subject to pre-CRR treatment and transitional treatments subject to phase out as prescribed in Regulation (EU) No 575/2013 (i.e. CRR residual amounts)	-	
41a	Residual amounts deducted from Additional Tier 1 capital with regard to deduction from Common Equity Tier 1 capital during the transitional period pursuant to article 472 of Regulation (EU) No 575/2013	-	472, 472(3)(a), 472 (4), 472 (6), 472 (8) (a), 472 (9), 472 (10) (a), 472 (11) (a)
	Of which items to be detailed line by line, e.g. Material net interim losses, intangibles, shortfall of provisions to expected losses etc	-	
41b	Residual amounts deducted from Additional Tier 1 capital with regard to deduction from Tier 2 capital during the transitional period pursuant to article 475 of Regulation (EU) No 575/2013	-	477, 477 (3), 477 (4) (a)
	Of which items to be detailed line by line, e.g. Reciprocal cross holdings in Tier 2 instruments, direct holdings of non-significant investments in the capital of other financial sector entities, etc	-	
41c	Amount to be deducted from or added to Additional Tier 1 capital with regard to additional filters and deductions required pre- CRR	-	467, 468, 481
	Of which: ... possible filter for unrealised losses	-	467
	Of which: ... possible filter for unrealised gains	-	468
42	Qualifying T2 deductions that exceed the T2 capital of the institution (negative amount)	-	56 (e)
43	**Total regulatory adjustments to Additional Tier 1 (AT1) capital**	**0**	
44	**Additional Tier 1 (AT1) capital**	**0**	
45	**Tier 1 capital (T1 = CET1 + AT1)**	**9,056,309**	
	Tier 2 (T2) capltal: Instruments and provisions		
46	Capital instruments and the related share premium accounts	-	62, 63
47	Amount of qualifying items referred to in Article 484 (5) and the related share premium accounts subject to phase out from T2	-	486 (4)
	Public sector capital injections grandfathered until 1 January 2018	-	483 (4)
48	Qualifying own funds instruments included in consolidated T2 capital (including minority interests and AT1 instruments not included in rows 5 or 34) issued by subsidiaries and held by third parties	-	87, 88, 480
49	of which: instruments issued by subsidiaries subject to phase out	-	486 (4)
50	Credit risk adjustments	-	62 (c) & (d)
51	Tier 2 (T2) capital before regulatory adjustments	-	
	Tier 2 (T2) capltal: regulatory adjustments		
52	Direct and indirect holdings by an institution of own T2 instruments and subordinated loans (negative amount)	-	63 (b) (i), 66 (a), 67, 477 (2)
53	Holdings of the T2 instruments and subordinated loans of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)	-	66 (b), 68, 477 (3)
54	Direct and indirect holdings of the T2 instruments and subordinated loans of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	-	66 (c), 69, 70, 79, 477 (4)
54a	Of which new holdings not subject to transitional arrangements	-	
54b	Of which holdings existing before 1 January 2013 and subject to transitional arrangements	-	
55	Direct and indirect holdings by the institution of the T2 instruments and subordinated loans of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions) (negative amount)	-	66 (d), 69, 79, 477 (4)
56	Regulatory adjustments applied to tier 2 in respect of amounts subject to pre-CRR treatment and transitional treatments subject to phase out as prescribed in Regu- lation (EU) No 575/2013 (i.e. CRR residual amounts)	-	
56a	Residual amounts deducted from Tier 2capital with regard to deduction from Common Equity Tier 1 capital during the transitional period pursuant to article 472 of Regulation (EU) No 575/2013	-	472 , 472(3)(a), 472 (4), 472 (6), 472 (8) (a), 472 (9), 472 (10) (a), 472 (11) (a)
	Of which items to be detailed line by line, e.g. Material net interim losses, intangibles, shortfall of provisions to expected losses etc	-	
56b	Residual amounts deducted from Tier 2 capital with regard to deduction from Additional Tier 1 capital during the transitional period pursuant to article 475 of Regu- lation (EU) No 575/2013	-	475, 475 (2) (a), 475 (3), 475 (4) (a)
	Of which items to be detailed line by line, e.g. reciprocal cross holdings in at1 instruments, direct holdings of non significant investments in the capital of other financial sector entities , etc	-	
56c	Amount to be deducted from or added to Tier 2 capital with regard to additional filters and deductions required pre CRR	-	467, 468, 481
	Of which: ... possible filter for unrealised losses	-	467
	Of which: filter for unrealised gain - reserves from reevaluation of avaible for sale asset	-	468
	Of which: filter for unrealised gain - reserves from defined pension plan	-	468

71	[non relevant in EU regulation]		
	Amounts below the thresholds for deduction (before risk weighting)		
72	Direct and indirect holdings of the capital of financial sector entities where the institution does not have a significant investment in those entities (amount below 10% threshold and net of eligible short positions)	39,747	36 (1) (h), 45, 46, 472 (10) 56 (c), 59, 60, 475 (4) 66 (c), 69, 70, 477 (4)
73	Direct and indirect holdings by the institution of the CET 1 instruments of financial sector entities where the insti- tution has a significant investment in those entities (amount below 10% threshold and net of eligible short positions)	88,518	36 (1) (i), 45 , 48, 470, 472 (11)
74	Empty Set in the EU		
75	Deferred tax assets arising from temporary differences (amount below 10% threshold, net of related tax liability where the conditions in Article 38 (3) are met)	10,158	36 (1) (c), 38, 48, 470, 472 (5)
	Applicable caps on the incluslon of provisions in Tier 2		
76	Credit risk adjustments included in T2 in respect of exposures subject to standardized approach (prior to the application of the cap)	-	62
77	Cap on inclusion of credit risk adjustments in T2 under standardised approach	-	62
78	Credit risk adjustments included in T2 in respect of exposures subject to internal ratings-based approach (prior to the application of the cap)	-	62
79	Cap for inclusion of credit risk adjustments in T2 under internal ratings-based approach	-	62
	Capital Instruments subject to phase-out arrangements (only applicable between 1 Jan 2013 and 1 Jan 2022)		
80	Current cap on CET1 instruments subject to phase out arrangements	-	484 (3), 486 (2) & (5)
81	Amount excluded from CET1 due to cap (excess over cap after redemptions and maturities)	-	484 (3), 486 (2) & (5)
82	Current cap on AT1 instruments subject to phase out arrangements	-	484 (4), 486 (3) & (5)
83	Amount excluded from AT1 due to cap (excess over cap after redemptions and maturities)	-	484 (4), 486 (3) & (5)
84	Current cap on T2 instruments subject to phase out arrangements	-	484 (5), 486 (4) & (5)
85	Amount excluded from T2 due to cap (excess over cap after redemptions and maturities)	-	484 (5), 486 (4) & (5)

Table 7: Capital instruments main features template

Ref	Heading	
1	Issuer	BRD-Groupe Societe Generale
2	Unique identifier (eg CUSIP, ISIN or Bloomberg identifier for private placement)	ROBRDBACNOR2
3	Governing law(s) of the instrument	Romanian law
	Governing law(s) of the instrument	Romanian law
4	Transitional CRR rules	CET1
5	Post-transitional CRR rules	CET1
6	Eligible at solo/(sub-)consolidated/ solo&(sub-)consolidated	Solo and consolidated
7	Instrument type (types to be specified by each jurisdiction)	Ordinary Shares
8	Amount recognised in regulatory capital (RON million, as of most recent reporting date)	2,516
9	Nominal amount of instrument	10
9a	Issue price	N/A
9b	Redemption price	N/A
10	Accounting classification	Capital
11	Original date of issuance	NA
12	Perpetual or dated	Perpetual
13	Original maturity date	No maturity
14	Issuer call subject to prior supervisory approval	N/A
15	Optional call date, contingent call dates and redemption amount	N/A
16	Subsequent call dates, if applicable	N/A
	Coupons / dividends	
17	Fixed or floating dividend/coupon	Floating
18	Coupon rate and any related index	N/A
19	Existence of a dividend stopper	N/A
20a	Fully discretionary, partially discretionary or mandatory (in terms of timing)	Full discretion
20b	Fully discretionary, partially discretionary or mandatory (in terms of amount)	Ful discretion
21	Existence of step up or other incentive to redeem	N/A
22	Noncumulative or cumulative	N/A
23	Convertible or non-convertible	N/A
24	If convertible, conversion trigger(s)	N/A
25	If convertible, fully or partially	N/A
26	If convertible, conversion rate	N/A
27	If convertible, mandatory or optional conversion	N/A
28	If convertible, specify instrument type convertible into	N/A
29	If convertible, specify issuer of instrument it converts into	N/A
30	Write-down features	N/A
31	If write-down, write-down trigger(s)	N/A
32	If write-down, full or partial	N/A
33	If write-down, permanent or temporary	N/A
34	If temporary write-down, description of write-up mechanism	N/A
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	The most subordinated claim in case of liquidation
36	Non-compliant transitioned features	No
37	If yes, specify non-compliant features	N/A

3 Capital requirements

MINIMUM CAPITAL REQUIREMENTS

From a regulatory perspective, capital requirements cover:

- credit risk, in respect of all business activities, but excluding the trading book business
- operational risk, foreign exchange risk and settlement risk in respect of all business activities
- position risk in trading book and
- credit valuation adjustment risk of OTC derivative instruments.

The calculation of credit risk capital requirement takes into account the transaction risk profile and is computed according to the standardized approach (CRR Part 3, Title 2, Chapter 2) using the Financial Collateral Comprehensive Method and information regarding credit assessments performed by external credit assessment institutions (ECAI).

The capital requirement for general position risk is calculated using the Maturity-based method. Capital requirement for credit valuation adjustment is determined using the standardized method.

The capital requirement for operational risk is calculated according the CRR, Part 3, Title 2, Chapter 4, using advanced measurement approaches (AMA). BRD, as a member of the Société Générale Group, uses AMA to measure operational risk since 2008 based on the SG internal methodology and calculation. The allocation of operational risk capital requirements to the sub-consolidated entities is based on net banking income and history of operational risk losses.

An overview of RWA and minimum capital requirements is presented below.

Table 8: EU OV1 – Overview of RWAs

	RWAs	Minimum capital requirements
Credit risk (excluding CCR)	**24,473,767**	**1,957,901**
Of which the standardised approach	24,473,767	1,957,901
CCR	**333,131**	**26,650**
Of which mark to market	*151,516*	*12,121*
Of which the standardised approach	*21,308*	*1,705*
Of which CVA	*160,308*	*12,825*
Market risk	**228,830**	**18,306**
Of which the standardised approach	*228,830*	*18,306*
Operational risk	**2,751,525**	**220,122**
Of which advanced measurement approach	*2,751,525*	*220,122*
Amounts below the thresholds for deduction (subject to 250% risk weight)	246,689	19,735
Floor adjustment	0	0
Total	**27,787,253**	**2,222,980**

SUPERVISORY REVIEW AND EVALUATION PROCESS (SREP) REQUIREMENTS

On top of the total regulatory ratio of 8% set by Art 92 from CRR, starting 2016, based on NBR requirements, BRD Group maintained additional own funds to cover risks resulting from internal assessment and SREP (supervisory review and evaluation process) amounting to 4.61% of RWA during 2020 (5.18% during 2019). Thus, the TSCR ratio (total SREP capital requirements) requirement for BRD Group was 12.61% for 2020 (vs. 13.18% during 2019).

Overall capital requirements (OCR) represent the total of SREP requirements and capital buffers, namely:

- A Conservation Buffer in CET1 capital intended to absorb losses during periods of stress. This buffer is mandatory and fully effective from 1 January 2019 and amounts to 2.5% of total RWA.

- A Countercyclical Buffer that may be imposed during periods of excessive credit growth when system-wide risk is building up and is capped at 2.5% of total RWA. According to NBR Order 12/2015 the level of countercyclical buffer was established at 0% for credit exposures in Romania. BRD Group maintained an overall countercyclical buffer rate, expressed as a percentage of the relevant risk exposure amount, of 0.006% (1.35 million RON) at 2020 end, driven by exposures on non-Romanian entities (mainly from Czech Republic).

- Other systemically important institutions (O-SIIs) identified by NBR which have been authorized in Romania, may be subject to an O-SII Capital Buffer of up to 2% of the total RWA. BRD was identified as O-SII by NBR and O-SII Capital Buffer is 1% starting with 1 January 2016.

- A Systemic Risk Buffer was imposed, according to NBR Order 4/2018, starting with 30 June 2018, with the aim of supporting the adequate management of credit risk and enhancing banking sector resilience to unanticipated shocks, amid unfavourable structural circumstances. The buffer is applied to all exposure and is calibrated at 0%, 1% or 2%, depending on the level of the non-performing loans ratio and the coverage ratio, according to the methodology described in NBR Order 8/2018. The systemic risk buffer for January - June 2020, based on the average NPL and coverage ratio, at consolidated level, at each reference date, September 2018, December 2018, March 2019 and June 2019, applicable for BRD is 1%. The systemic risk buffer for July – December 2020, based on the average NPL and coverage ratio, at consolidated level, at each reference date, March 2019, June 2019, September 2019 and December 2019, applicable for BRD is 0%. As the capital requirement for structural buffers is determined as the max of O-SII buffer and systemic risk buffer and an O-SII buffer of 1% was already applied, the systemic risk buffer had no effect on the capital requirements for BRD in 2020.

INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS (ICAAP)

In accordance with Article 148 of the Emergency Ordinance no. 99/2006 on credit institutions and capital adequacy, as subsequently amended and NBR Regulation no. 5/2013 on prudential requirements for credit institutions, BRD has in place a process for internal assessment of capital adequacy to risks.

The Bank performs periodically an evaluation of internal capital adequacy to risks by comparing the available own funds with internal capital requirements. The general framework for ICAAP is updated annually and the capital adequacy monitoring is performed on a quarterly basis.

A risk assessment is performed annually, and involves the evaluation of all risks to which the Bank may be exposed and the identification of the significant risks.

The internally evaluated capital requirement is determined using „Pillar 1 plus" approach, where the capital requirements for the following risks are added to the regulatory capital requirements:

- Credit risk concentration, residual risk from usage of credit risk mitigation techniques, risk related to foreign currency lending to unhedged borrowers and risks arisen from applying less sophisticated approaches
- Interest rate risk in banking book
- Funding risk
- Strategic risk
- Other significant risks: reputational risk, compliance risk, model risk

For the purposes of the internal capital adequacy assessment, the available own funds are considered equal to the regulatory own funds.

Based on the Business and Risk Management Strategy and on the Risk Appetite, the Bank makes projections of the own funds and capital requirements on a three years horizon in order to ensure their adequacy, both in normal course of business and under stress situations.

4 Credit risk adjustments

According to Article 442 of Regulation (EU) No 575/2013, credit institutions should disclose information regarding credit quality of assets. Qualitative comments as per Table EU CRB-A – Additional disclosure related to the credit quality of assets, are presented below.

The definitions of 'past due' and 'impaired' used by the Bank for accounting purposes are presented below:

- **Past due**

Past due exposures include all receivables (outstanding principal, interest and past due amounts) that are not individually impaired but are at least one day past due. The past due status is measured in number of days passed since the due date. For the purpose of default classification (further explained), the reference to number of days past due envisages clearly defined materiality thresholds (considering principal, interest, fees and other obligations related to loans and commitments), by type of client: Retail and Non-Retail.

- **Impaired assets**

According to IFRS 9, a financial asset is considered “credit-impaired financial asset” when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. The concepts of *impairment* for accounting purposes and *default* for regulatory purposes are convergent, comprising of the following events:

- past due event (more than 90 days past due on any material credit obligation)
- indications of unlikeliness to pay (such as: severe alteration in the counterparty’s financial standing leading to a high probability of it being unable to fulfil its overall commitments, recovery actions initiated by the Bank, ongoing legal procedures that may lead to avoiding or deferring the payment of a credit obligation, restructuring under the circumstances of financial hardship experienced by the debtor)

The Bank assesses on an forward-looking basis the expected credit losses (“ECL”) for the following categories of financial assets: loans and placed deposits measured at amortised cost, debt instruments measured at fair value to other comprehensive income, loan commitments and financial guarantee contracts, contract assets and trade receivables.

Financial assets subject to loss allowances are classified in Stage 1, Stage 2, Stage 3 or POCI, as described below:

- ***Stage 1*** when there is insignificant or no impairment of credit quality since initial recognition; Loss allowance shall be equal to 12 months ECL
- ***Stage 2*** when a financial asset shown significant increase in credit risk since initial recognition, though not impaired; Loss allowance shall be equal to lifetime expected credit losses (“LTECL”)
- ***Stage 3*** financial assets classified as impaired; Loss allowance is represented by LTECL
- ***POCI*** financial assets that are credit impaired on initial recognition. Loss allowance shall be equal to LTECL. ECLs are only recognized or released to the extent that there is a subsequent change in the expected credit losses.

The Bank established criteria to perform the assessment of significant increase in credit risk since initial recognition considering both relative and absolute thresholds.

The approaches adopted by the Bank for determining credit risk adjustments are described below:

Stages 1 and 2

ECL for non-defaulted financial assets (Stages 1 and 2) are computed collectively, based on homogenous groups. The Bank groups financial assets on the basis of similar credit risk characteristics (type of client, client rating, type of product, type of collateral) that are indicative of the debtors’ ability to pay all amounts due, according to the contractual terms.

The key elements of ECL calculation are outlined below:

- PD - *Probability of Default* models are based on a two-step approach: building of the through-the-cycle (TTC) marginal PD curve and Adjustment of the TTC curve to incorporate point in time and forward looking information;

Two different PDs are needed:

  - 12-month PD (exposures in Stage 1): estimated probability of default for the next 12 months horizon (or over the remaining life of the financial instrument, if less than 12 months);
  - Lifetime PD (LT PD - exposures in Stage 2): estimated probability of default over the remaining life of the financial instrument.

- LGD - *Loss Given Default* model takes into account cashbacks, portfolio sales and collateral recoveries;
- EAD - *Exposure at Default* estimation at each time step is based on internally modelled Credit Conversion Factors ("CCF");
- Point in time and forward looking transformation for ECL parameters.

Stage 3 ECL

ECL for impaired financial assets is measured either individually or collectively (based on homogenous groups). The **individual assessment** entails the assessment of the counterparty risk (translated into a rating / classification based on debtor's financial position and its economic perspectives) and the estimation of the possible recoveries: the analysis shall identify and quantify the future cash flows, which will be used for a total or partial reimbursement of the obligations towards the Bank. The cash flow estimation relies on the capacity of the client/business to generate revenues, the proceeds resulting from sale of collaterals, or other clearly identified sources of repayment. An impaired financial asset is classified as individually significant if the total exposure exceeds a predefined materiality limit.

For impaired financial assets that are not individually significant the ECL is computed for **homogeneous pools of receivables** and estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Statistical methods are used to determine impairment losses at homogeneous group level, considering the cash flows for the remaining life of an asset.

Overlays

The inputs and models used for calculating ECL may not always capture all characteristics of the market at reporting date. To reflect this, the Bank assesses the need/ opportunity for additional amounts of provisions in the form of overlays, in order to address:

- Sector of activity specific risks (adjustment of ECL on sectors that have a different default behaviour from the whole calibration segment)
- Visible macroeconomic threat impossible to be captured by the models (typically, when the predicted stress did not occur in the observed past serving as a base for models)

The table below shows the year-end and average net exposures to credit risk (excluding CCR) by exposure class (on-balance-sheet and off-balance-sheet exposures). The end-of-period exposure is further broken down by geographical areas and by sectors of activity and moreover, an overview on credit quality for these exposures is presented, by exposure class and geographical areas.

Table 9: EU CRB-B – Total and average net amount of exposures

	Net value of exposures at the end of the period	Average net exposures over the period
Central governments or central banks	22,549,992	19,366,657
Regional governments or local authorities	912,086	912,379
Institutions	4,317,121	4,990,318
Corporates	22,369,572	21,516,329
Of which: SMEs	*6,528,785*	*6,317,524*
Retail	17,395,113	17,338,480
Of which: SMEs	*1,278,248*	*1,162,991*
Secured by mortgages on immovable property	6,951,046	7,074,940
Of which: SMEs	*235,129*	*409,549*
Exposures in default	477,567	508,423
Collective investments undertakings	18,637	17,255
Equity exposures	166,686	179,520
Other exposures	3,400,669	3,798,737
Total standardised approach	***78,558,489***	***75,703,039***

The table below presents the breakdown of on-balance-sheet and off-balance-sheet net exposures to credit risk (excluding CCR) by geographical areas and exposure classes. BRD Group's exposure is focused on Romania (90%).

Table 10: EU CRB-C – Geographical breakdown of exposures

Starting December 31, 2019 the Guidelines on disclosure of non-performing and forborne exposures (EBA/GL/2018/10) are in force. According to this guideline, all credit institutions are required to disclose a set of templates on non-performing and forborne exposures and foreclosed assets. The Gross NPL ratio, computed according to article 13 of the guideline, reached 3.87% (at BRD Group level), as of December 2020 end, therefore Templates 1, 3, 4 and 9 are prepared in compliance with the above mentioned guideline.

The table below presents the gross carrying amount of forborne exposures and the related accumulated impairment, provisions, accumulated negative change in the fair value due to credit risk, and collateral and financial guarantees received on forborne exposures.

Table 14: Credit quality of forborne exposures (Template 1)

	Gross carrying amount/nominal amount of exposures with forbearance measures				Accumulated impairment, accumulated negative changes in fair value due to credit risk and provisions		Collateral received and financial guarantees received on forborne exposures	
	Performing forborne	Non-performing forborne			On performing forborne exposures	On non-performing forborne exposures		Of which collateral and financial guarantees received on non-performing exposures with forbearance measures
			Of which defaulted	Of which impaired

Closing balance	**1,851,006**

5 Exposures subject to measures applied in response to the COVID-19 crisis

The outbreak of the COVID-19 pandemic has prompted rapid social and economic responses worldwide. Within the EU, Member States have implemented a broad range of support measures aimed at minimizing the medium- and long-term economic impacts of the pandemic. The response included some forms of moratorium on payments of credit obligations (with the aim of supporting the operational and liquidity challenges faced by borrowers), introduced either jurisdiction-wide (legislative moratorium) or voluntary industry-wide or individual initiatives by institutions (non-legislative moratorium).

In this context, EBA issued guidelines (EBA/GL/2020/08) to clarify the requirements for public and private moratoria, which if fulfilled, will help avoid the classification of exposures under the definition of forbearance or as defaulted under distressed restructuring. In addition, in order to ensure an appropriate understanding of institutions risk profile and asset quality, and to strengthen transparency, in accordance to EBA/GL/2020/07, credit institutions identified as O-SII are subject to: i) disclosure requirements on exposures subject to legislative and non-legislative moratoria on loan repayments applied in the light of the COVID-19 crisis and ii) disclosure requirements on newly originated exposures that are subject to public guarantee schemes applied in response to the COVID-19 crisis.

The below templates, 1, 2 and 3, are prepared according to EBA/GL/2020/07, with the reference date, December 31, 2020.

Table 20: Information on loans and advances subject to legislative and non-legislative moratoria (Template 1)

	Gross carrying amount							Accumulated impairment, accumulated negative changes in fair value due to credit risk							Gross carrying amount
		Performing			Non performing				Performing			Non performing			
			Of which: exposures with forbearance measures	Of which: Instruments with significant increase in credit risk since initial recognition but not credit-impaired (Stage 2)		Of which: exposures with forbearance measures	Of which: Unlikely to pay that are not past-due or past-due <= 90 days			Of which: exposures with forbearance measures	Of which: Instruments with significant increase in credit risk since initial recognition but not credit-impaired (Stage 2)		Of which: exposures with forbearance measures	Of which: Unlikely to pay that are not past-due or past-due <= 90 days	Inflows to non-performing exposures

The moratorium reflects a combination of statewide legislation (GEO 37/2020) doubled by various initiatives of the banking system. The state moratorium introduced through GEO 37 has the following main features: 1) validity period from 31st of March to 15th of May and further prolonged to 15th of June; 2) grace period up to 9 months (not beyond 2020 end); 3) interest is accrued (capitalized for consumer loans, repaid in 60 equal installments for housing loans); 4) available to debtors without day past due (at request date) and affected by the crisis (based on declaration for individuals, loss of 25% of revenues for companies) 5) no reclassification triggered as non-performing, consistent with EU regulators' position.

In addition to legislative moratorium provisions as adopted through the GEO 37/2020 and its implementation norms, BRD has also designed internal deferral programs in order to support its debtors under the temporary distress. These measures fall into the non-legislative category. For the eligible debtors the moratorium-related changes to the contract are not automatically considered forbearance measures, hence no automatically default trigger.

Table 21: Breakdown of loans and advances subject to legislative and non-legislative moratoria by residual maturity of moratoria (Template 2)

	Number of obligors	Gross carrying amount							
			Of which: legislative moratoria	Of which: expired	Residual maturity of moratoria				
					<= 3 months	> 3 months <= 6 months	> 6 months <= 9 months	> 9 months <= 12 months	> 1 year
Loans and advances for which moratorium was offered	54,951	4,128,390							
Loans and advances subject to moratorium (granted)	51,892	3,967,553	2,227,665	3,962,472	5,081	-	-	-	-
of which: Households		2,942,419	1,783,653	2,941,720	699	-	-	-	-
of which: Collateralised by residential immovable property		1,991,073	1,137,926	1,991,073	-	-	-	-	-
of which: Non-financial corporations		1,025,135	444,012	1,020,752	4,382	-	-	-	-
of which: Small and Medium-sized Enterprises		844,124	388,967	839,741	4,382	-	-	-	-
of which: Collateralised by commercial immovable property		338,452	243,918	338,452	-	-	-	-	-

An additional measure within the relief package to support the economy at national level was the approval of an envelope of 3 billion EUR of state guarantee and interest subsidies to support SME sector financing within IMM INVEST loan facility program. The data on the program are presented below:

Table 22: Information on newly originated loans and advances provided under newly applicable public guarantee schemes introduced in response to COVID-19 crisis (Template 3)

	Gross carrying amount		Maximum amount of the guarantee that can be considered	Gross carrying amount
		of which: forborne	Public guarantees received	Inflows to non-performing exposures

of which: Households	-			-
of which: Collateralised by residential immovable property	-			-
of which: Non-financial corporations	738,853	-	628,776	1,001
of which: Small and Medium-sized Enterprises	733,600			1,001
of which: Collateralised by commercial immovable property	16,003			-

6 Unencumbered assets

The level of asset encumbrance is low for BRD's activity (encumbered assets and collateral received represented 0.1% of total assets at 2020 end) and refers mainly to repo (repurchase agreements) with governmental securities.

7 Remuneration policy

BRD's Remuneration Committee is a permanent consultative committee that supports the Board of Directors in performing their responsibilities regarding the elaboration and supervision of the implementation of the Remuneration Policy.

At the beginning of 2020, the Committee consisted of 3 non-executive directors, of which one is independent: Mr. Benoît Ottenwaelter (Chairman), Mr. Jean-Luc André Joseph Parer (Member) and Mr Jean Pierre Vigroux (Independent member).

From May, the Committee consisted of: Mr. Jean Pierre Vigroux (Chairman), Mr. Benoît Ottenwaelter (Member) and Mr. Bogdan Dragoi (Independent member). In December the Committee component was changed as follows: Mr. Giovanni Luca Soma (Chairman), Mr. Benoît Ottenwaelter (Member) and Mr. Jean Pierre Vigroux (Independent member).

The Remuneration Committee meets annually, or whenever necessary. In 2020, 3 meetings of the Remuneration Committee took place.

The members attended to the Remuneration Committee's meetings as follows: Mr. Benoît Ottenwaelter and Mr. Jean Pierre Vigroux 3 meetings, Mr. Bogdan Dragoi 2 meetings and Mr. Jean-Luc André Joseph Parer 1 meeting.

The Remuneration Committee analyses the Bank's remuneration policy which it submits to the Board of Directors for approval; it submits proposals regarding the individual remuneration of non-executive directors and the additional individual compensation of the directors entrusted with specific functions within the Board as well as the remuneration of the officers; it supervises directly the remuneration of the coordinators of the risks management and compliance functions; and it supervises the application of the principles of the staff remuneration policy and informs the Board of Directors in this respect.

During 2020, the Remuneration Committee did not use external consultants, basing their decisions on their expertise and that of the Human Resources Department.

Variable remuneration – reflects sustainable and risk-adjusted performance as well as the performance that exceeds the necessary performance to fulfil the duties provided for in the employee's Job Description as part of the employment terms.

Variable remuneration:

- It is not guaranteed or carried forward automatically from one year to another. The variable component distribution mechanisms do not guarantee the granting of sums over several years. Thus, the variable remuneration is subject to a fair annual review process;
- The guaranteed bonuses are strictly regulated by the remuneration policy. BRD personnel is not overly dependent on bonuses;
- It does not limit the Bank's ability to strengthen its capital base;
- It is not paid through means or methods that facilitate the circumvention of the regulations in force;
- It does not encourage taking risks which influence the Bank's risk profile;
- It also takes into consideration all current or future risks;
- Payments relating to the early termination of a contract reflect performance achieved over time and do not reward failure or misconduct.

The Bank may decide to reduce partially of completely the granting of variable remuneration if it cannot be supported in accordance with the overall financial situation of the Bank, of the structure in which the activity is carried out and the employee concerned.

The variable remuneration is considerably reduced if the Bank records a poor or negative financial performance, taking into account both the current remuneration as well as the reductions in payments related to the sums due, as previously determined, including malus or clawback agreements signed. Up to 100% of the variable remuneration is subject to malus or clawback signed agreements.

For different types of jobs, it is possible to use different schemes for granting the variable remuneration. There is a maximum limit defined for the variable component, which may not exceed 100% of the fixed component of the total remuneration.

For sales staffs, commercial objectives are set to take into account the rights and interests of the consumers, so:

- Sales process is in the client's interest;
- Do not promote the provision of a specific product/ service or a category of products/ services over others products/ services such as products/ services which are more profitable for the institution or for an employee, to the detriment of the consumer.

The special principles applicable to the categories of identified staff are:

- The variable remuneration may decrease or not even be paid at all.
- The personnel members are paid, or receive the rights related to the variable remuneration, including the deferred part thereof only if the variable remuneration can be supported in accordance with the Bank's overall financial situation and if it can be justified in accordance with the performance of the Bank, the structure in which the activity is carried out and the individual concerned.
- The personnel members receive the rights of the deferred part of the variable remuneration, subject of the fulfillment of the minimum performance requirements.
- A major part, which, in all cases, accounts for at least 40% of the variable remuneration component, is deferred for a period of at least three years. For identified staff, at least 50% of any variable remuneration shall consist of shares or equivalent, which are subject to an appropriate retention policy, designed to harmonize the incentives with the Bank's long-term interests.
- The personal strategies for risk hedging or insurance policies related to remuneration and liability to counteract the risk alignment effects stipulated in the personnel remuneration agreements are prohibited. One may insure against the currency risk using derivatives.

For Executive Committee members, 60% of the variable remuneration is deferred for a period of 5 years.

For Identified Staff not members of the Executive Committee, between 40 and 60% of the variable remuneration is deferred for a period between 3 and 5 years.

The Ratio between fix and variable remuneration in BRD is maximum 1:1, in line with NBR's Regulation no 5/2013.

Aggregate financial information regarding remuneration for 2020 are presented below.

Table 23: Information about the remuneration of the employees (consolidated prudential perimeter)

	Total

8 Leverage ratio

Following CRD IV implementation, BRD computes and reports leverage ratio which is designed specifically to limit the risk of excessive leverage in credit institutions and was introduced as a complementary tool to the regulatory capital adequacy ratio.

The leverage ratio reached 12.98% as at 31 December 2020 (**including** 2020 **year net result net of dividends approved by the GSM)**, versus 11.84% at 31 December 2019 and well above the 3% minimum requirement **(level that is enforced based on Regulation 2019/876 amending CRR starting with June 2021).**

The sustainable level of leverage ratio results from the strong capital base, namely high level Common Equity Tier 1 capital and a balance-sheet structure specific to the universal bank business model with core focus on retail activities.

Table 25: **LR Sum - Summary reconciliation of accounting assets and leverage ratio exposures**

	Summary reconciliation of accounting assets and leverage ratio exposures	Applicable Amount 31-Dec-2020
1	Total assets as per published financial statements	63,557,745
2	Adjustment for entities which are consolidated for accounting purposes but are outside the scope of regulatory consolidation	-1,869

Choice on transitional arrangements and amount of derecognised fiduciary items		
EU-23	Choice on transitional arrangements for the definition of the capital measure	Fully-loaded
EU-24	Amount of derecognised fiduciary items in accordance with Article 429(11) of Regulation (EU) No 575/2013	

9 Use of credit risk mitigation techniques

MAIN TYPES OF SECURITIES ACCEPTED

BRD has a cash flow based lending approach, as the Bank expects the debt to be serviced primarily through the future cash flow (legal entities)/ income (individuals) generated by the debtor.

Credit risk mitigation techniques, in the form of collateral (funded protection) or guarantee (unfunded protection), are accepted merely to mitigate credit risk and they cannot serve as a substitute for the borrower's ability to meet obligations. Their scope is to minimize the loss in case of debtor default through lowering the credit losses with the collateral execution proceeds or through transferring the risk to the guarantee issuer.

The Bank accepts the following **main types of securities**:

- Financial collateral (cash, deposits, Romanian Government bonds, shares, agricultural warehouse receipts, bill of lading)
- Non-financial collateral (real estate, machinery and equipment, inventories, intangibles, receivables, payment instruments)
- Guarantees (surety ship contracts, letters of guarantee, letters of comfort, financial guarantees issued by guarantee funds and Eximbank, sovereign guarantees, endorsements, credit risk insurance)

The most frequent type of accepted collateral is represented by real estate assets.

Policies and processes for collateral/ guarantees valuation and management

In order to reduce its credit risk-taking, BRD pursued an active management of securities by:

- Following a collateral policy structured along the following dimensions:
  - strict criteria for validation, acceptance and eligibility of collateral/ guarantees
  - common principles governing the management of securities, as well as of the roles and responsibilities in the process of their management
- Revaluation of the collateral portfolio, in order to reduce the discrepancies between the market value of collaterals and the value used by the Bank in its internal processes (monitoring, provisioning etc.)
- Estimation of the collateral recovery value by applying discount coefficients to its market value, when determining the level of provisions on individual assessment basis
- Regular monitoring through specific risk indicators

During the credit approval process, an assessment is performed on the value of guarantees and/ or collateral, their legal enforceability and the guarantor's ability to meet its obligations. This process also ensures that the collateral or guarantee successfully meets the minimum criteria.

Risk management centralized function is responsible for approving the operating procedures for regular valuation of guarantees and collateral, whether during the approval phase for a new loan or upon the annual renewal of the credit application. The risks associated with the valuation activity are monitored via implemented internal controls.

The Bank has also implemented a set of risk management principles regarding concentration on credit risk mitigations techniques and, in order to ensure an appropriate monitoring, concentration limits defined on single protection provider.

For ***Real Estate collaterals*** the market value is estimated by external or internal certified evaluators. Valuation is performed in accordance with the International Valuation Standards and ANEVAR Standards and Recommendations. Real estate valuations are verified by the competent units, independently from the credit approval process. The Bank uses the market approach and income approach as valuation methods for real estate. Revaluation is performed yearly for commercial /

industrial / agricultural real-estate, plots of land, at least once every 3 years for residential real estate or with higher frequency if the real estate market displays a significant negative evolution.

Movable assets collaterals (machinery & equipment, inventory, other movables) are appraised based on the value recognized for financial or other related purposes (balance sheet, insurance etc.). The Bank monitors the movable assets market value on a frequent basis, but at least yearly. If the market is subject to significant changes, market value is monitored more frequently.

Before a ***guarantee*** is accepted, the protection provider is assessed in order to measure its solvency and risk profile, using the same principles as for direct credit exposures towards BRD's clients/ counterparties. The credit risk mitigation effect of guarantees is closely linked to the guarantor's creditworthiness and the secured amount must be reasonably proportionate to the economic performance capabilities of the protection provider. The main guarantor for BRD's clients is the Romanian State, which intervenes to sustain credit activity by national wide guarantee programs implemented through intermediation of Guarantee Funds (FNGCIMM or FGCR) or Eximbank, mainly "Prima Casa" program.

The table below shows the amount of unsecured loans and secured loans, either by collateral (68% of secured loans) or financial guarantees.

Table 27: EU CR3 – Eligible CRM techniques – Overview

	Exposures unsecured – Carrying amount	Exposures secured – Carrying amount	Exposures secured by collateral	Exposures secured by financial guarantees	Exposures secured by credit derivatives
Total loans	20,286,948	14,915,266	10,100,744	4,814,522	0
Total debt securities	16,361,490	0	0	0	0
Total exposures	63,643,223	14,915,266	10,100,744	4,814,522	0

The breakdown of net exposures to credit risk (excluding CCR) by exposure class before and post CCF and CRM is presented below.

Table 28: EU CR4 – Standardised approach – Credit risk exposure and CRM effects

	Exposures before CCF and CRM		Exposures post CCF and CRM		RWAs and RWA density	
Exposure classes	On-balance-sheet amount	Off-balance-sheet amount	On-balance-sheet amount	Off-balance-sheet amount	RWAs	RWA density
