client measures for the purpose of preventing and combating money laundering and terrorist financing.

To this end, We check whether you are included in the databases of persons accused of terrorist financing or economic crime or, as the case may be, in the databases of people with high risk of fraud.

We also use profiling mechanisms/automated decision-making processes to ensure continuous monitoring of the client portfolio and client transactions from the perspective of prevention of money laundering and terrorist financing/implementation of international sanctions. Such mechanisms/processes may use data collected about you in the know-your-customer process, or data from public sources/data aggregators, and may also rely on artificial intelligence-based models. If, following individual analysis, we consider that your profile exceeds the level of risk accepted by the Bank, we will refuse to enter into a relationship with you or the existing relationship will be subject to restrictions or unilaterally terminated. The use of automated decision-making processes for the purposes of customer due diligence, preventing and combating money laundering and terrorist financing reduces the risk of human error and discrimination, allowing banking services to be provided in accordance with the law, without blocking the enrolment/transaction management process, and allowing adequate collection and reporting of customer and transaction information, as required by law.

For certain banking products, We use automated individual decisions based on scoring to **conclude the contract** for the product you requested. For example, We use the loan scoring to assess your eligibility for contracting the requested loan. The algorithms that We use for the loan scoring consider different criteria, in line with our risk policy, such as your financial condition, your creditworthiness, exposure, payment behaviour, employer status, debt history, etc.

The criteria and the algorithms that We consider relevant may vary over time.

We use automated individual decisions also for ensuring the security of the Bank's products and services, as well as to protect you as much as possible against the risk of fraud, thereby ensuring the proper execution of the contract concluded with you.

For example, We monitor the payments you make online or with your card, and if We identify suspicious transactions (such as unusual repetitive payments like frequency, value, etc., or other transactions with illogical sequences - such as payments in different locations (cities) at short intervals, which did not allow the holder to move to those locations in accordance with the current technique) and/or do not match to your transactional profile, We adopt measures on automated basis (such as blocking the suspicious transaction, blocking the card, blocking the account, etc.).

Also, if We have obtained your express consent in this regard, We may use automated individual decisions to transmit you (We or companied within BRD Group, depending on your option) personalized commercial communications (for details, please see Section III G, above).

You will have appropriate guarantees for the automated decisions We take. In particular, you will have the right: (i) to express your point of view on that particular automated decision; (ii) to request a reassessment of the decision, based on human intervention; respectively (iii) to challenge the automated decision.
