New e-BRD Mobile users: Initiation flow for BRD Sign authentication tool

v 1.0

Internet & Mobile Banking for legal entities
New e-BRD Mobile users: Initiation flow for BRD Sign authentication tool

! Before starting the BRD Sign initialization,
please make sure that:
- you have received the email containing the data needed for BRD Sign initialization.
- the e-BRD contract administrator has taken the necessary steps to approve your user on the server, an action that can be done through your BRD Account Manager or by calling the Helpdesk Cash Management team directly by using the phone numbers.

To activate BRD Sign, please follow the below steps:

1 **DOWNLOAD & INSTALL e-BRD Mobile APP**

from the Play or App Store, on your Android/iOS device.

**e-BRD Mobile**
BRD – GROUPE SOCIETE GENERALE SA

2 **ACCESS THE APP AND LOG IN**

by using the e-BRD user name (user code), according to the user's annex, and the secret pass.
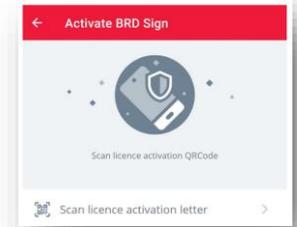

3 **DO NOT SAVE THE SECRET PASS**

Depending on the phone setting you might be asked to store the secret pass.
Please deny this proposal, as the pass will be changed anyway at the final of the initialization process.
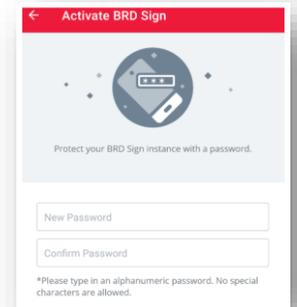

4 **SCAN THE QR CODE (CRONTO CODE) FROM THE INITIATION LETTER**

received by email tapping **Scan licence activation letter**.

5 **SETUP THE BRD Sign (authentication tool) PASS**

Write it into the **New password** field and repeat it in the **Confirm password**, then press Continue.

6 **BIOMETRIC PROTECTION ACTIVATION**

If you have activated the biometric protection and wish to use it for BRD Sign, you need to tap the fingerprint icon.
If you don't wish to activate the biometric protection, verification will be done based on the **password** established at **Step 5**.

7 **SUCCESS**

The BRD Sign authentication tool is now active.
From now on you can use it to authenticate yourself for login and signature into the e-BRD app ori into the www.e-brd.ro.
